

IMA-Europe, a Brussels-based Association representing the industrial minerals industry, is searching for immediate entry into function:

A TECHNICAL ADVISER

Profile:

- University degree (e.g. engineering degree, Master in environmental science or doctorate in Science);
- Min 3 years professional experience in the field of environmental protection and regulatory affairs related to energy intensive industries (e.g. lime, cement, steel, glass, paper);
- Fluency in English. French or German is an asset;
- Computer literate (proficient user of MS Office);
- Excellent analytical, interpersonal, organisational, communication (in writing and oral) and negotiation skills;
- Diplomatic, flexible, assertive, rigorous & efficient.

Job:

- Technical/scientific support to the follow-up and advocacy of EU regulatory developments, especially in the field of IPPC and BAT (BREFs elaboration & revision), CO₂ related policies, Emission Trading, air emissions and waste incineration;
- Relations with EU institutions, trade organisations, institutes and scientific & industry experts;
- Representation of the Association in external fora, conferences, working groups, etc.;
- Coordination of technical/scientific projects and EU registration dossiers
- Drafting of technical files and meeting reports;
- Management of working groups and of an Association's section;
- The position includes a few travels within the EU.

Offer:

- Training in enterprise
- A challenging job within a dynamic team in an international environment
- Competitive salary package

Please send CV and application letter, including passport photo to:
